CLEARLY BETTER

# SOLAR POWERED AND HARD WIRED ACTIVE ROAD STUDS

Solar Powered

## SR-20

**Bright and reliable.** One of the brightest and most reliable road studs available today. The SR-20 offers an energy efficient solar powered solution.

Hard Wired

## SR-20C

**Programmable and highly effective.** The SR-20C is the hard wired version of the SR-20 and can be connected to any input/output. An added feature is that this stud is completely programmable.

Solar Powered

## SR-15

**Excellent Night Time Luminance.** Cost effective dual bi-directional LEDs light up the road, providing all weather delineation. Solar powered and tested to withstand up to 60 tonnes.

Hard Wired

## SR-30

**Multiple Colour Combinations.** Incorporating high brightness LEDs with chromatic calibration and multiple colour options, making them particularly useful for delineation, guidance and warning signals.

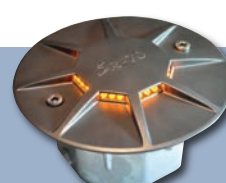

Hard Wired

## SR-45 SR-48

**Ideal for Cycle Paths, Roads & Airports.** One of the most intelligent and powerful hard wired super light studs. The SR-45 unidirectional and the SR-48 bi-directional studs are powerful, robust and 100% waterproof.

Hard Wired

## SR-70

**360° Programmable LEDs.** Ideal for roads, tunnels, parks and airports, these hardwired 360° LED road studs can be seen from all sides. Bright and robust with the option of programmable functions and remote controlling.

Hard Wired

## SR-05

**Designed for Entry and Exit Lanes.** Very fast and easy to install, the SR-05 although designed originally for entry and exit lane demarcation, can be used in a variety of situations. This hard wired stud consumes very little power when in operation.

Hard Wired

## SR-T24

**Projected Tunnel Illumination.** Specially designed for tunnels, the SRT24 offers projected lighting and directional illumination. Offering high luminosity both day and night, this stud is both low maintenance and easy to replace.
