Rennicks
Clearly Better

Technology for Smarter Highways

Rennicks Virtual Journey Time System is live, flexible and reactive. It is perfect for incident management, events and large infrastructure schemes. Furthermore, by eliminating the need for hardware deployment, costs are saved, delays in procurement are reduced and there is no risk to road worker safety.

"The system is a great tool for reassuring the road user their journey may not be as disrupted as first perceived. We are able to display accurate and reliable journey times for our diversion routes and find the time displayed on the sign provides important road user information when operating our overnight road closure programme."

Manchester Smart Motorways

"With the Rennicks Virtual Journey Time System we've been able to provide drivers with live times for diversions using remote data, so there's no need for equipment along the diversion route."
